A PDF file with the name 'info.pdf' placed in the knowledge-base folder, alongside the knowledge-base files, will be recognised by Identikit and offered to the user as a help PDF file.

So you can create a PDF file, using whatever tools you like, to give users of your ID resource guidance and information as you see fit.

This simple example 'info.pdf' file was created with Microsoft Word and 'saved as' a PDF.

Note that the filename is case sensitive – it must all be lowercase: info.pdf.
